PROFESSIONAL SUMMARY

Metal Products and Jewelry Design student at the Faculty of Applied Arts, specializing in jewelry CAD design, CNC-based relief carving, and 3D visualization. Experienced across the full design pipeline, from hand sketching and technical drafting to CAD modeling, CNC toolpath preparation, and photorealistic rendering. Passionate about continuous learning and professional development, skilled in time management and prioritizing tasks efficiently, and consistently recognized for attention to detail and delivering high-quality results.

CORE SKILLS

Jewelry & Metal Design Software: Rhino, Rhino Gold, Art CAM (CNC relief and toolpath design), SolidWorks (3D modeling and technical drafting), Autodesk 3ds Max (photorealistic rendering and visualization)

Computer-Aided Design (CAD): AutoCAD

Creative & Editing Software: Adobe Photoshop, Adobe Illustrator (digital editing, retouching, and creative visualization of jewelry and metal designs)

Office Software: Microsoft Word, Excel, PowerPoint

Design & Technical Skills: Jewelry CAD design, gold modeling, CNC carving and relief design, 3D modeling and technical drafting of metal components, photorealistic rendering, hand sketching and manual design, technical drawing

Professional Skills: Time management, task prioritization, attention to detail, quality control, continuous learning

Surface Finishing: Knowledge of surface finishing and coating technologies for metallic and non-metallic products, including conductive surface preparation techniques for non-conductive materials to enable electroplating; familiar with coating processes and applications for cookware, lighting fixtures, and jewelry, including various coating systems, materials, and their decorative, protective, and functional purposes

Languages: Arabic (Native), English, French

EDUCATION

Bachelor of Applied Arts — Department of Jewelry and Metal Productions

Faculty of Applied Arts

TRAINING & PROFESSIONAL DEVELOPMENT

Summer Training — Military Factory

Jul 2023 – Aug 2023

- Completed a hands-on summer training program (16/7/2023 – 3/8/2023) focused on metal production processes.

NEBU Expo for Gold & Jewelry — International Exhibition for Gold & Jewelry in Egypt

Nov 2023

- Participated in the exhibition on 26/11/2023, gaining exposure to industry trends and professional networking within the gold and jewelry sector.

Ministry of Finance — Egyptian Mint Authority

Aug 2025

Design & Manufacturing Trainee (10 Aug 2025 – 21 Aug 2025)

- Gained hands-on experience in coin manufacturing, metal forming, and quality control.
- Observed production processes, industrial manufacturing, and product design.

Kandil Egypt for Chandeliers & Lighting

Jul 2024

Design & Manufacturing Trainee (23 Jul 2024 – 31 Jul 2024)

- Assisted in lighting product design, metal fabrication, and manufacturing processes.
- Gained exposure to production workflow, assembly, and quality control.

DESIGN PORTFOLIO & PROJECT EXPERIENCE

Jewelry & Metal Design Portfolio Projects

- Designed and produced original jewelry and metal product concepts across the full workflow: hand sketching, CAD modeling in Rhino and Rhino Gold, technical drafting in SolidWorks, CNC relief and carving design in Art CAM, and photorealistic rendering in 3D Max.
- Created precision CNC carving and relief designs using Art CAM software for jewelry and metal surface detailing.
- Produced 3D models and technical drawings of metal products and components using SolidWorks.
- Developed photorealistic 3D renderings and visualizations of jewelry and metal design concepts using 3D Max.
- Applied Adobe Photoshop for digital editing, retouching, and creative visualization of finished designs.
- Compiled a professional online design portfolio showcasing sketches, CAD work, renderings, and finished, photographed pieces.
